ART: Two Birth day card [without any matter]

COMPUTER: Create a spreadsheet for a restaurant Bill in the format given below and write steps of every task on A4 sheet:

ABC Restaurant					
Customer Name.....					
Date of Sale.....		Bill No.			
(Bill Summary)					
S.No.	Name of Item	Quantity	Rate	Cost	
1	1. Insert the name of any ten food Items.				
2					
3					
4		1. Write down the approximate quantity in number format.			
5					
6					
7		1. Write down the approximate rate in number format.			
8					
9					
10					
			Total		
Calculate the Net Payable Amount by adding Total Cost and GST applied. Example: =sum(E17,E18)			GST @ 15%		
			Net Pay. Amt.		
Amount in words:.....					
.....					
Authorized Signatory					
.....					
.....					
.....					

1. Merge From A1 to E1
2. Apply a background color.
3. Write Text using Tahoma Font, Size = 16

Merge from A1 to B1

Merge From C1 to E1

1. Merge from A1 to E1.
2. Write the Content Italics

Use the Formula Cost= Rate * Quantity.
Example E1=C1*D1

1. Write down the approximate quantity in number format.

Repeat the same process for the remaining cells.

1. Write down the approximate rate in number format.

Calculate the total of Cost using the formula =sum(E7:E16)

Calculate the GST using formula 0.15* Total Cost.
Example: =0.15*E17

Merge the Cells from A21 to E22

Merge cells from A24 to E24.
Write the content using Left alignment.
