

Dear Parents,

Car pooling has numerous advantages like

- It saves our environment
- Reduces congestion
- Saves fuel and time
- Reduces pollution

Keeping this in mind we have thought to follow the system of car pool. It would only be possible if we get your co-operation & support.

Jingle Bell School

Dear uncle,

Hi! How are you I think our letter finds you at the top of the world. Car pooling is the system where 1 vehicle can drop many people at the same place.

We are writing this letter to you to start the system of car-pooling. Your ward can take another children from his colony to school and another day other parents can do the same.

Car-pooling has many advantages like it saves fuel, reduces pollution, it saves time and money. If you will follow this system there will be less traffic on the roads and it will increase co-operation and socialization.

Now we are ending this letter. Convey our regards to elders and love to youngsters. Hope that you will ponder upon our request.

Yours sincerely,

Students 4<sup>th</sup> Giladiolus.
